

BRACE ENDS

Brace ends are designed to provide fast and efficient guy strand termination in metal building construction. They are designed for use with standard guy strands 9/16 diameter or less. Holding strength is a minimum of 100% of the rated strength of the strand. Bracing ends have a left hand lay and are available in a complete range of sizes to fit any guy strand size. Birmingham Fastener's brace ends are manufactured by Payer Industries®.
